EXPERIENCE

Agripal

Jan. 2026 – Present

Software Engineer

Remote

- Architected a multi-tenant Learning Management System (LMS) using React.js, Node.js, and MongoDB, supporting 1,000+ users across 5+ organizations.
- Engineered learner features, including video streaming, multilingual support, and voice-assisted navigation to improve accessibility and user engagement.
- Automated tenant onboarding via AWS CDK, reducing manual configuration time from 5 hours to under 5 minutes.
- Optimized administrative workflows by building centralized dashboards for course, learner, and tenant configuration management.
- Integrated Google Analytics to drive data-informed product decisions based on learner behavior, completion rates, and feature usage.
- Enhanced system reliability and media security by integrating AWS S3, CloudFront, DASH streaming, and asynchronous processing with Redis/BullMQ.

TCS

Aug. 2024 – Dec 2025

Assistant System Engineer

Pune, MH

- Built responsive React.js components and forms for claim submission, policy details, and claim tracking, improving usability across insurance workflows.
- Strengthened backend application capabilities by enhancing Node.js APIs with validation rules, feature updates, and bug fixes to improve data processing and application reliability.
- Resolved production issues through troubleshooting, log analysis, and incident resolution while collaborating in an Agile development environment.

GBJ BUZZ Pvt Ltd

Dec. 2023 – June 2024

Frontend developer (Internship)

Remote

- Developed responsive front-end interfaces using React.js, enhancing performance and user engagement across platforms.
- Leveraged Sanity CMS and reusable modular components with API integrations to streamline content management and reduce development time.

PROJECTS

EduShare

- Built a full-stack learning platform enabling mentors to manage video-based courses and learners to track progress via interactive quizzes.
- Automated content generation by integrating AI-powered MCQ creation and asynchronous video summarization.
- Optimized application scalability by implementing Redux state management, BullMQ for background jobs, and Docker containerization.

EDUCATION

G. H. Raisoni College of Engineering

2020 – 2024

Bachelor of Technology in AI - 8.88 CGPA

Nagpur, MH
